# Boosting Urban Mobility Plans: aka 'BUMP'

Welcome to Module 6

Aberdare Hall, Cardiff University

Thursday  
26th June 2014

Co-funded by the Intelligent Energy Europe  
Programme of the European Union

# Module 6

# Bringing your planning together

Co-funded by the Intelligent Energy Europe  
Programme of the European Union

**Imagine your city in 20 years: What would you want it to look like? A place where children can play safely? Where the air is clean? Where you can walk to do your shopping? With lots of parks and green space? Where businesses can prosper?**

# Module 6 (final module)

Bringing together your local 'kit' (morning)

- Revisiting the inputs you have developed
- Checking for gaps
- Final challenge sessions
- Final 'to do list'

Keeping the momentum going (afternoon)

- Dealing with endorsement
- Resourcing and finding time
- Best use of coaching and mentoring

# Breaking the ice

Where are you?

- Technical progress – evidence base and plan-writing
- People resources
- Obstacles to the SUMP
- Stakeholder identification and involvement
- Funding and resourcing

# Sensecheck Point

The following evidence should now be in place or a 'route to completion'

- Project Gantt chart for the SUMP
- Final Scope of SUMP
- Spatial analysis/mapping data
- Measures table
- Stakeholder Engagement Plan
- Finance and Resource Plan

# By the end of today

- A final SUMP 'to do list' for each location using a pro forma
- A critical path outlining timing and any risks to finishing the process
- A bullet list of areas where coaching and support will be of best value to you

# Bringing together your SUMP

- Which inputs are you happy with?
- Where do you feel you need more evidence/time?
- What inputs are missing (and may be difficult to find)?

# Gap Analysis and Challenge

- Describe your process so far to another authority
- Allow for further challenge and questions
- List out any further actions or re-visiting that you need to do

# Completing your 'to do list'

- In your local authority teams please work through the pro forma provided to ensure that you have captured any 'missing elements' or risk areas for the SUMP

**This part is focused on technical delivery**

# Keeping the momentum going

- Dealing with endorsement
- Resourcing and finding time
- Best use of coaching and mentoring

# Barriers to Success

- Challenge each other on any areas where you think there will be risk to delivery because of 'people' and 'time'
- Add these to the risk part of your pro forma and discuss how you may overcome these

**This part is focused on people and skills aspects**

# Creative Resourcing

- What other data sets and sources can you piggyback on?
- Who else is working in the SUMP area that can give some practical help to your work?
- Are there any work packages you can 'brief up' (students, interns, consultants etc)

# Coaching and Mentoring

- List out the areas where you feel that coaching/mentoring will be of best value to you
- Identify specific activities if possible e.g.
  - SUMP presentation to senior managers
  - Facilitated workshop
  - Independent technical review
  - Tally up hours 'ideally' needed
- Identify key project lead contact
